EDUCATION

B.S. Computer Science

Arizona State University, Tempe, AZ

Expected May 2027

Cumulative GPA: 4.0

SKILLS

Languages: Java, C, C++, Python, Swift, SQL, MATLAB

Technologies & Tools: SwiftUI, SwiftData, MapKit, CoreLocation, URLSession, Git, Oracle Applications, Workiva, Xcode

Concepts: MVVM Architecture, REST API Integration, OOP, Data Structures, Software Testing & Validation, Debugging

PROFESSIONAL EXPERIENCE

Cable One: Oracle Business Systems Intern

June 2024 - August 2025, May 2026 - Present

- Created and maintained SQL-based reports using Oracle Applications and Workiva to support production business systems.
- Updated and executed test scripts to validate system workflows and identify functional issues.
- Automated invoice assignment processes using Oracle Workflow Tools, improving system reliability and reducing manual task handling.
- Developed custom SQL queries to generate task-specific reports and automated email notifications, improving operational efficiency.

Ed and Nadine Carson Student Athletic Center: Technology Assistant

March 2026 - Present

- Delivered Tier 1 help desk support, resolving technical requests for desktops, laptops, printers, and mobile devices across Windows and macOS.
- Assisted with configuration, imaging, and distribution of new desktop and laptop computers to end users.
- Maintained accurate IT asset inventory and provided on-site technical support at ASU athletic events.

Arizona State University: Undergraduate Learning Assistant

August 2025 - December 2025

- Guided students through applied programming exercises and team-based engineering projects, reinforcing core computing concepts.
- Provided debugging support for student teams and reviewed work prior to submission with constructive feedback.

PROJECTS

Study Buddy Finder (Swift, SwiftUI, SwiftData, MapKit, CoreLocation, REST API)

- Developed an iOS app enabling ASU students to find and connect with nearby study partners in real time using MVVM architecture.
- Integrated CoreLocation and MapKit for live session pins; designed session matching algorithm filtering by shared course enrollment and proximity.
- Consumed a REST API via URLSession with async/await to load university course data; persisted profiles and session history using SwiftData.
- Implemented study session scheduling, post-session ratings, and local push notifications for upcoming sessions.

Park Explorer App (Swift, SwiftUI, MapKit, MVVM)

- Architected a park discovery app using MVVM, separating data, business logic, and UI without CoreData or SwiftData.
- Integrated MapKit with in-map place search rendering points of interest as annotations; built UINavigationController drill-down to detail views.

L'Oréal Skincare Routine Builder (JavaScript, HTML/CSS, OpenAI API)

- Built an AI-powered skincare routine generator using JavaScript and the OpenAI API, featuring a product selection grid with real-time search filtering, a context-aware chat interface with conversation history, and secure API key storage via a Cloudflare Worker.
- Implemented RTL/LTR language toggle to support internationalization across right-to-left and left-to-right layouts.

VOLUNTEER WORK & COMMUNITY SERVICE

ASU Rotaract Club: Member

August 2023 - Present

- Volunteered with community organizations supporting refugees, foster youth, and underserved populations through food distribution, fundraising, and packing medical supplies for international aid.
